

RELEVANT ASSETS - FOCUSED FOLLOW-UP

Keep Each Trade Focused on Visible Work.

Organize landscaping, vegetation, fencing, gates and roadway-lighting observations for the team responsible for the corrective work.

What TruInspector supports

1

Landscape and vegetation condition

2

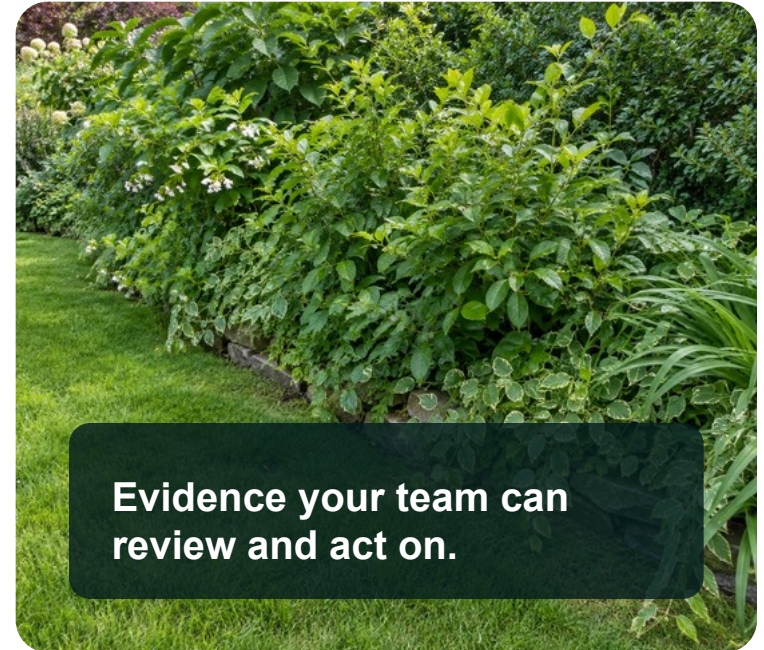

Fence, post and gate observations

3

Visible roadway-lighting concerns

Stay Ahead of Inspections and Keep Control of Your Project.

Ai-assisted observations support professional review. Confirm applicable standards, field conditions, measurements and project requirements.

Evidence your team can review and act on.

From evidence to report

1. Select the state, industry and evaluation type.
2. Upload photos or recorded video.
3. Submit for Ai analysis and review findings.
4. Download a detailed PDF or photo-linked Excel report.

ILLUSTRATIVE PICTURE REPORT

Landscape border and adjacent vegetation need maintenance

VISIBLE OBSERVATION

The border alignment and nearby vegetation appear uneven, with visible encroachment into the maintained edge. The photo does not establish plant health, irrigation performance or below-grade conditions.

RECOMMENDED CORRECTIVE-WORK STEPS

Confirm the intended landscape limits and plant material. Remove unwanted growth, reset or replace displaced edging, restore the bed profile, inspect irrigation coverage and document the finished boundary without damaging roots or utilities.

POTENTIAL PRODUCTS OR FIXTURES

Compatible landscape edging and stakes, approved mulch or soil amendment, hand tools, irrigation repair fittings if needed and temporary work-area markers.

Field verification required. The finding must be reviewed against the selected jurisdiction, applicable requirements, supplied contract documents and actual site conditions.

Illustrative image and finding - not a live inspection, official citation, engineering decision or compliance result.
