

SURFACE - STRIPING - SYMBOLS - RPMS

The Surface. The Markings. The Evidence.

Document visible pavement deterioration, striping, pavement symbols and raised pavement marker concerns with evidence your paving team can review.

What TruInspector supports

1

Pavement and paved shoulders

2

Striping and pavement symbols

3

Raised pavement marker observations

Stay Ahead of Inspections and Keep Control of Your Project.

Ai-assisted observations support professional review. Confirm applicable standards, field conditions, measurements and project requirements.

Evidence your team can review and act on.

From evidence to report

1. Select the state, industry and evaluation type.
2. Upload photos or recorded video.
3. Submit for Ai analysis and review findings.
4. Download a detailed PDF or photo-linked Excel report.

ILLUSTRATIVE PICTURE REPORT

Pavement edge deterioration and material loss

Illustrative roadway edge

VISIBLE OBSERVATION

The pavement edge shows raveling and localized material loss along the transition to the adjacent shoulder. The image supports a visible condition record but does not establish depth, length or underlying base condition.

RECOMMENDED CORRECTIVE-WORK STEPS

Measure the affected length and depth, check drainage and shoulder support, remove unstable material, rebuild the edge with compatible pavement and base materials, compact the repair and restore adjacent markings or shoulder grade as required.

POTENTIAL PRODUCTS OR FIXTURES

Approved asphalt mix, tack coat, aggregate base, compaction equipment, edge-forming tools and traffic-control devices.

Field verification required. The finding must be reviewed against the selected jurisdiction, applicable requirements, supplied contract documents and actual site conditions.

Illustrative image and finding - not a live inspection, official citation, engineering decision or compliance result.
